Eric Lee

A Mechatronic System Engineering undergrad at SFU that has shown vast interest and great motivation in mobile development and web app design

EXPERIENCE

WORDPRESS DEVELOPER
MissBehua.ca
Vancouver BC

Incorporating knowledge of PHP and WordPress together to build an e-commerce website for presenting product information in clean and concise design to the users

Usage of social media to promote and market the website for the purpose of SEO optimization

WEB APP DEVELOPER
InStream
Vancouver BC

Developing revamped user interface design that involves AJAX, jQuery, and PHP for presenting instagram and twitter feeds to the user

Open source code available on github for easy collaboration

WEBSITE DESIGN
Online Order
Taipei, Taiwan

Developing simple yet intuitive website for the distributors to order products from the main company.

Using PHP to parse the images and generate HTML layout while using jQuery to present lightbox and waterfall layout in addition to Twitter Bootstrap for great presentation on all devices. PHP also handles server response and send email to notify incoming orders
